

DIGITAL TRANSFORMATION WITH ODOO

A Strategic Framework for Building Intelligent Enterprises

Helping organizations modernize operations, accelerate innovation, and deliver measurable business outcomes through Odoo ERP and Artificial Intelligence.

PREPARED BY QUOCENT SDN. BHD.

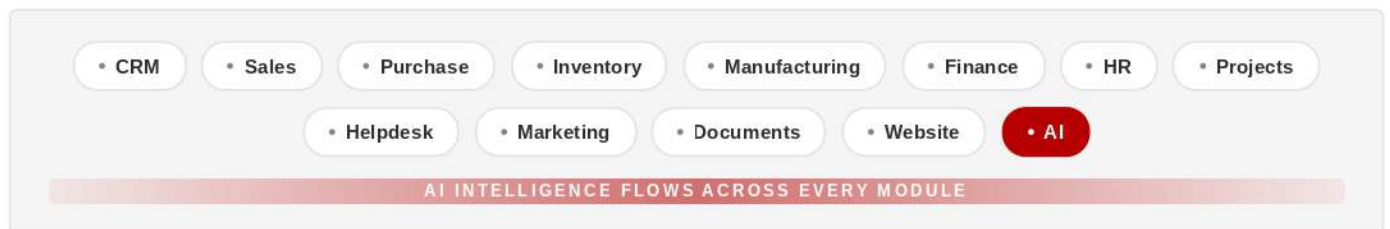

Why Digital Transformation Matters

- 
Legacy Systems & Data Silos
 Disconnected point solutions and ageing on-premise systems leave finance, operations, and sales working from different versions of the truth.
- 
Manual, Repetitive Operations
 Paper-based approvals and spreadsheet workarounds slow execution and consume hours that should go toward higher-value work.
- 
Limited Executive Visibility
 Without a single data backbone, leadership lacks real-time visibility into performance until it is too late to act.
- 
Rising Expectations & AI Disruption
 Customers expect real-time service and competitors are moving faster with AI — standing still is no longer a neutral choice.

Business Impact & Industry Insights

- 88%**
 of organizations now use AI in at least one business function, up from 78% a year earlier
Source: McKinsey Global Survey (2025)
- 89%**
 touchless invoice processing achievable through intelligent automation
Source: Deloitte / Basware
- 30%**
 faster financial close projected from embedded AI in cloud ERP by 2028
Source: Gartner (2026)
- 94%**
 of employees perform repetitive tasks that are partially or fully automatable
